EVENT SCRIPT

Assigned Members – Manage waiting room

Assigned Member – Welcome note (3-4 mins)

Hello everyone, thank you so much for being here today! We appreciate you pivoting to online for today's event! As much as in-person would have been great, this was the best option for now.

I would like to welcome all students, faculty, staff, and of course, our guests to Future of the Workplace! It is our pleasure to organize the event and give our students a chance to get some important questions answered.

Please remember, throughout the event, you have to remain on Mute. Having videos on would be good so that our panelists can see you! We'll have 30-40 mins of moderated Q&A and then some time for Audience Q&A. You can either raise your hand or type your question in the chat. We will direct your question to our guests.

Assigned Member – Introducing guests (5 mins)

I'll take a minute to introduce our 3 panelists for today.

We welcome Guest 1 Name

Thanks for being here!

Guest 2 -

Welcome!

Last but not the least, I'm happy to introduce Guest 3.

Thanks for being here everyone! We'll now head into the moderated Q&A session.

Assigned Member – Moderated Q&A (3-4 mins each)

Assigned Member – to Guest 2

There's a lot of talk about the addition of API platforms, where customers can integrate their banking data into other apps and vice-versa. Could you talk about this trend in the industry?

Follow-up - What could be a possible disadvantage of customers being given such options?

Assigned Member – to Guest 1

When the internet of things is combined with artificial intelligence, the result is the intelligence of things which helps finance professionals track ledgers, transactions, and other records in real-time. With the support of such 4th industrial advancements, where do you see audit going? Especially, internal audit. What has your team seen as change in doing things?

Assigned Member – to Guest 3

With TMT sector, and the kind of work you do with Transactions, Business Transformation, and Restructuring, what are some concerns that clients have brought? Let's say, cybersecurity. How does new technology change your work?

Assigned Member – to Guest 2

Banks used to be frontrunners in automation. But now, their once cutting-edge technologies have turned into legacy systems that hinder innovation. There are new players, fintech startups who don't have that burden of outdated technologies. That being said, we know automation is priority in banks and fintech companies both. As briefly as possible, what are the potential opportunities to automate in finance services? How does your company prioritize such long-term projects?

Assigned Member – to Guest 1

Big data has been on the rise and is driving every industry. You work in a section of the company which supports the electronics business. Talk about the kind of data you get in audit and how should one approach that?

Assigned Member – to Guest 3

As someone who recently graduated, what suggestion could you give to our students about resources, keeping up with the news, how to watch trends etc.?

Assigned Member – to all

Major organizational steps include adding roles like CIOs and other IT leaders to manage new tech. But how do you see your day-to-day tasks changing with the advent of automation, AI etc.? Or even what should we students expect our jobs to be like when we join your industry?

STOP AT 4:40/45

Assigned Member - Audience Q&A

Assigned Member - EXTRA Q&A If time

To all - What kind of technology trends are seen at your workplace, internally? Could you talk about how your organization has used technology for remote work, other initiatives for business/operational efficiency, communication tech and so on?

To all - We know the magnitude of data to have increased, what has caused the 4TH Industrial Revolution to come. Along those lines, is there a change in the data itself? To elaborate, is the data being collected different than before and how has it changed?

To all – Is there anything that sparked your interest about any topic – big data, IoT, AI etc.? Does a topic interest you and make you feel it might make your job easier/better?
